

Plenary Assembly in Cascais, Portugal

Already in a few months, from the 9th until the 11th October, the annual Plenary Assembly of the ICDLI will take place in Portugal.

This year the ICDLI will meet in Cascais, a beautiful coastal town next to Lisbon, in order to discuss and present all state-of-the-art developments, techniques and trends of this branch. The Plenary Assembly has become an important meeting point for the European decorative laminates industry which is reflected in its high-class lectures on international market conditions.

During the ICDLI's assembly a diverse supporting program offers you the opportunity to foster old business contacts and form new ones.

Furthermore, the participants of the partner program have the chance to experience the fascination of Sintra. This little town next to Lisbon was classified by UNESCO as World Heritage at the category of Cultural Landscape, because of its perfect fusion between natural richness and the magnificence of its monuments.

Join us and take part in the European-wide network of decorative laminates, the Plenary Assembly in Portugal, and send an E-Mail to: christine.euler@pro-kunststoff.de until the 20th of September.

**ICDLI – PLENARY ASSEMBLY
LISBON/CASCAIS
9th until the 11th October 2013**

Laminates-Gallery, Interzum 2013, Cologne

Interzum

The ICDLI draws a positive résumé of the biggest international trade fair for suppliers to the furniture industry: The Laminates-Gallery 2013 supported by the Cologne Trade Fair was an overwhelming success. Under the slogan “Decorative laminates – a unique experience to hands and eyes” the exhibition attracted many guests, especially designers and architects who could experience haptic and visual advantages of decorative laminates.

New Guideline for CE-marking

The new Guideline for CE-marking of decorative laminates (HPL) in line with the European construction products regulation (CPR) for internal and external wall and ceiling finishes, EN438-7 will be officially published soon. In November 2006 the application technology committee of the ICDLI published a guideline on the process for CE marking of decorative laminates in line with the valid construction products directive for internal and external wall and ceiling finishes. On the 1st July, the new construction products regulation (CPR) has fully replaced the construction products directive (CPD) which has been in force since 1989. The change from CPD to CPR has also brought a number of changes for CE marking which is also taken account into this new edition of this technical leaflet.
