

Interzum 2015

ICDLI HPL-Gallery

The trade fair for suppliers to the furniture industry "Interzum" is taking place in Cologne/Germany from May 5 to 8, 2015. International exhibitors are going to present the new trends and developments of their industry.

The ICDLI will also be a part of the project "innovation of interior" which particularly addresses to interior designers. The booth invites the guests to explore the multifaceted world of HPL.

The association makes good use of the occasion and presents both the variety and potential of High Pressure Laminates. It will not only focus on the new and innovative designs, but will also concentrate on the function of HPL. Decorative laminate is more than a „good-looking“ surface and the ICDLI presents the many possibilities of HPL regarding its use and design. Samples and sufficient handouts will inform the guests about the composition, product features and main characteristics of HPL.

One highlight at the fair will be the guided tour at the booth of the ICDLI. Architects and designers will get the important facts about this many-sided

material and will also feel to have made an inspiring experience.

The stand at the trade fair is basically supported by the members of the ICDLI. Samples of HPL, kraft paper and décor paper as well as pictures of applications are provided by the members.

For further information about the ICDLI booth, please contact Christine Euler: christine.euler@pro-kunststoff.de

Plenary Assembly 2015

Save the Date for the next ICDLI Plenary Assembly, taking place from October 7 to 9, 2015 in Ljubljana/Slovenia.

The ICDLI is up to the minute and keeps an ever-closer eye on the trends of the market.

The ICDLI invites you to discuss the market reviews and the economic situation.

The program will be divided into four main topics: Design, technical and environmental issues as well as market.

The annual meeting is taking place in the capital of Slovenia. The castle and the historic district endow the city with unique character and a special charm.

Join us and take part in the Europe-wide network of the Decorative Laminates Industry, the Plenary Assembly in Ljubljana!

**Save the Date – Next ICDLI
Plenary Assembly
7. - 9. October 2015 in Ljubljana!**

New technical leaflet

The ICDLI published a new technical leaflet: "Laboratory furnishings with HPL". The material properties of HPL are highly suitable for the furnishing of laboratory equipment. The technical leaflet informs about these characteristics and the application possibilities in the inner and outdoor area of laboratories. Particularly, the leaflet contains information about the durability of HPL, if being exposed to mechanical weight and high temperature. Furthermore, the reaction of the decorative laminate is checked with chemicals, electrostatics and in regard to its disinfectability.

Formaldehyde Sub Group

The Technical Commission of the ICDLI decided to set up the Formaldehyde Sub Group for the collation of new data and development status. The main topics are going to be the standardization of methods and measurements and the search for alternatives in collaboration with FormaCare.
