

Plenary Assembly in Budapest

The ICDLI invites you to Budapest from 4th to 6th October. The international branch meeting is dominated by a brightening European industry.

The ICDLI is pleased to have won many international speakers for the conference in 2017 as well. The multi-faceted meeting program is divided into four areas: design & trends, technical developments, environment and market. Highlights include: The presentation of the annual report with the data to the European HPL market. In addition, ICDLI and its members will receive the updated EPD.

For the first time the Plenary Assembly takes place in the cultural metropolis Budapest, which is characterized by its modern charm. The city on the Danube offers an ideal backdrop for the attractive evening program, to make contacts and to exchange ideas on different topics.

From now on you can request the registration documents and register: gabriele.koegler@pro-kunststoff.de

**Plenary Assembly in Budapest
4. – 6. October 2017**

Technical Commission at CATAS

The Technical Commission of the ICDLI met for the first time this year with the renowned Italian test institute CATAS. The members of the Technical Commission were able to gain an overview of the very good technical equipment of CATAS. In addition, the institute's management reported on current developments in formaldehyde and other important topics.

In addition to the reports from the various work areas of the Technical Commission, questions were raised as to the implementation of part 6 of the HPL standard EN 438. One of the most important projects is currently the revision of the environmental product declaration (EPD) for HPL.

Successful HPL Gallery at the Interzum

The ICDLI presented itself at the Interzum trade fair in Cologne from 16 to 19 May and can look back on a successful trade fair. With the HPL Gallery, ICDLI informs especially architects about the possibilities of the HPL material system and its advantages. At the booth the surface diversity, current decortrends and the spectrum of the functionality of HPL were presented. Because of its many features, HPL is ideally suited for indoor and outdoor use, as well as for kitchens and office furniture, doors, worktops, facades, window sills, wet cells and flooring.

Manufacturer Meeting

The European manufacturers of HPL came together for their "Manufacturer Meeting" at Sonae Indústria in Porto. The focus of the meeting was the development of the European market for HPL. The participants discussed a variety of different marketing measures for HPL. The next "Manufacturer Meeting" will take place in St. Petersburg next year.

Market Research Group

The Market Research Group of the ICDLI met again to work for the annual report. The annual report with the current data of the European HPL market will be presented at this year's Plenary Assembly.
