

## Plenary Assembly 2015

The next ICDLI Plenary Assembly is taking place from October 7 to 9, 2015 in Ljubljana/Slovenia. The speakers will spot and discuss future trends and developments.

Famous industrial designer will give an overview about new trends. Mrs. Monica Fecht from Renolit SE is going to present the new color trends for the next seasons and describes impressively the world of colors of motions and emotions. A further highlight is the lecture from the INTERPRINT-team. One of the speakers is Salvatore Figliuzzi, who is going to illustrate décor innovations.

But technical issues will also be an important part of the year's conference. Speakers from industry, research and developments give perspectives about digital printing, functional laminates and Formaldehyde. Further topics will be the market situation of HPL and the construction Industry in Eastern Europe.

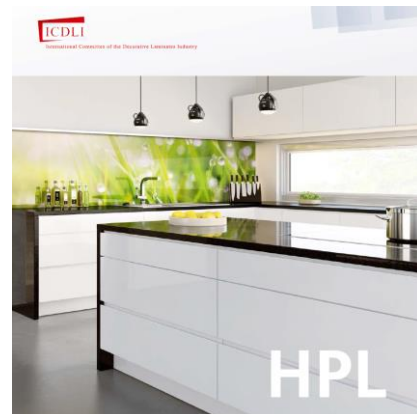

It is a many-sided program with a Europe-wide network platform of the Decorative Laminates Industry.

The historic center of Ljubljana and the castle invite the guests for an easy-going stay.

Plenary Assembly  
7. - 9. October 2015 in Ljubljana!**

## New brochure about HPL

In the course of this exhibition the ICDLI presented the new brochure about HPL. There, the most important facts about the all-rounder are summarized. The brochure illustrates clearly and briefly the hard facts about HPL. History, material, product features, environmental points and applications will be presented with demonstrative photos.

## Manufacturer Meeting

The Manufacturer Meeting took place at Argolite AG in Willisau and the invited CEO's discussed about pertinent questions in the specific markets. One of the main topics has been the product position. The group discussed about of possibilities for a better product marketing to communicate the services and qualities plus solutions for individual problems. Changes in the supply chain and the distribution have also been important issues. Furthermore the technical commission of the ICDLI presented the status of EN 438 standard and the Market Research Group shows the current ICDLI statistics.

## Interzum 2015

### ICDLI HPL Gallery

The ICDLI was part of the project "Innovation of Interior" at the Interzum 2015 in Cologne/Germany and presented new decor trends and product features of HPL.

At the ICDLI's booth the guests received an impression about the potential of HPL by the presentation mounted on the walls and in special topic-cubes. The cubes offered information about environmental topics, design, functionality, durability and quality concerning the material. Samples and separate production material such as overlay paper and craft paper were also presented in order to help understanding the composition and the main characteristics of HPL.

A special guided tour for architects presented them the new trends in decors and functions. The ICDLI communicated features about the high quality material and many architects felt inspired by the innovations of HPL.

### Technical Commission

The Technical Commission of the ICDLI worked at a bunch of new new technical leaflets. In the revised leaflet about Manufacturing HPL is mentioned the manufacturing process and the different types of HPL. The data sheet about technical data of HPL informs about the technical characteristics and physical properties of HPL. The third leaflets shows the multifunctional possibilities of HPL. It describes whiteboards, magnetic and write-on surfaces as well as projection screens. The new leaflets will be published soon. Furthermore the group worked on the information sheet called "HPL – Health and Safety: Information on Formaldehyd".
