

Interzum HPL gallery

The trade fair for suppliers to the furniture industry “interzum” is taking place in Cologne/Germany from May 21 to 24, 2019. International exhibitors are going to present the new trends and developments of their industry.

The ICDLI will also be a part of the project “innovation of interior” in Hall 4a which particularly addresses to interior designers. The booth invites the guests to explore the multifaceted world of HPL.

The association makes good use of the occasion and presents both the variety and potential of High Pressure Laminates. It will not only focus on the new and innovative designs, but will also concentrate on the functionality of HPL. Decorative laminate is more than a „good-looking“ surface and the ICDLI presents the many possibilities of HPL regarding its use and design. Samples and sufficient

handouts will inform the guests about the composition, product features and main characteristics of HPL.

The booth at the trade fair is basically supported by the members of the ICDLI. Samples of HPL, kraft paper and decor paper as well as pictures of applications are provided by the members.

For further information regarding the ICDLI booth, please contact Sarah Charlotte Krämer: sarah.kraemer@pro-kunststoff.de

Technical Committee

Under the chair of Dr. Lutz Reitzel, Resopal GmbH, the Technical Commission of the ICDLI met at ICDLI Headoffice in Frankfurt. In addition to the main topics of standardization, application technique, formaldehyde, and environment two new technical leaflets are finalized: Fire behavior of HPL and a Comparison of the certification systems for buildings DGNB, LEED and BREEAM.

Dr. Derra, head of the testing institute ISEGA gave a very detailed update on food contact testing under EU Legislation. Main Legislation is the VO (EG) 1935/2004, the GMP – good manufacturing practices and the VO (EU) 10/2010. He pointed out that HPL in food contact can be marked with the so called food contact symbol.

**Technical Committee at Sika in Hamburg
May 7 – 8, 2019**

Technical bulletins

New technical Leaflets are available. The first one is a reviewed information on Fire behavior of HPL. The second is completely new and

describes the Comparison of the certification systems for buildings DGNB, LEED and BREEAM. It is a very helpful information in direction to the new ICDLI Environmental Product declaration (EPD).

All technical leaflets are available on our ICDLI webpage www.icdli.com.
