**ICDLI launches digital HPL Compendium in English**

## **Knowledge platform for High Pressure Laminate now available for global audiences**

**Frankfurt am Main, 08/09/2026.** The International Committee of Decorative Laminates Industries (ICDLI) has launched the English-language edition of its digital HPL Compendium, making one of the industry's most comprehensive manufacturer-independent references on High Pressure Laminate (HPL) available to an international audience. Accessible free of charge at [www.hpl-compendium.com](http://www.hpl-compendium.com), the platform provides architects, designers, specifiers, fabricators, manufacturers and other HPL professionals worldwide with reliable technical information, practical guidance and up-to-date knowledge on the properties, applications and sustainability of HPL.

The digital Compendium provides comprehensive information on the manufacturing, processing, properties and applications of HPL, while also covering sustainability, product safety, quality requirements and relevant European standards. "The HPL Compendium represents decades of technical expertise gathered within the European HPL industry and reflects the knowledge and experience associated with HPL manufactured in Europe," says Dr Michael Peham, Chairman of the ICDLI Technical Commission and Product and Certification Expert at Fundermax. "Our objective is to provide reliable, scientifically sound and practical information that supports everyone working with HPL. By making the Compendium available in English, we are opening this valuable source of knowledge to professionals around the world and contributing to an even better understanding of this high-performance material manufactured in Europe."

Since the publication of its first printed edition in 2019, the HPL Compendium has become the industry's most respected technical reference works. Published in four languages so far and comprising more than 170 pages, it provides an in-depth overview of HPL manufacturing, properties, processing, applications and sustainability. Developed by leading experts from the European HPL industry, the Compendium combines technical excellence with practical guidance, making it a valuable resource for both experienced professionals and newcomers alike.

### **Expanding access to HPL knowledge**

The English-language website marks another milestone in ICDLI's long-term strategy to make high-quality technical knowledge on HPL freely accessible to people around the world. Further language versions are already in preparation. At the same time, the digital Compendium itself will continue to evolve through regular updates, ensuring that new technical developments, standards, regulatory requirements and practical insights are continuously incorporated.

With the launch of [www.hpl-compendium.com](http://www.hpl-compendium.com), ICDLI reinforces its role as the international knowledge hub for HPL and its commitment to supporting architects, planners, designers, manufacturers and fabricators with independent, up-to-date and practice-oriented technical knowledge.

### **About the ICDLI**

*The ICDLI International Committee of the Decorative Laminates Industry is the association of European HPL manufacturers and their suppliers. It is the European voice of the HPL industry and an important interface to the media, politics, society and science.*
