

HPL – The Material for Your Creative Projects!

Forget boring surfaces – High Pressure Laminate (HPL) is the game-changer for design and architecture!

Unlimited Design Freedom

Colors, patterns, textures galore. Want curves? No problem – HPL bends and even works as a writable or magnetic surface.

Built to Last

Scratch-proof, impact-resistant, and abrasion-resistant – no matter how hard you push it. Outdoors? Weather-, UV-, and frost-proof.

Clean & Safe

Non-porous, hygienic, dirt-repellent – perfect for kitchens, labs, or public spaces. Fire safety? Check. Heat resistance? Check.

Green & Smart

More than 50 years of life, made from renewable resources, sustainability certified and low-emission – it doesn't get better than this!

Where can you use HPL?

Construction Applications, Furniture and Interior Design, Hospitality, Healthcare, Public Facilities, Transportation and Automotive Engineering, Sports and Leisure Areas – your creativity has no limits.
